PREAMBLE

Buildings are the vessels of our stories; they are our cultural artifacts and contain the stories of who we are, where we have come from, and where we shall be going to. The programme on ancient texts is intended towards understanding the probable conceptualisation and evolution of certain architectural spaces that are of profound interest and significance in contemporary times as well. It is an attempt to design a bridge that connects to the ancient systems and texts that have been anticipated as the origin of these architectural evolutions and probable influencers in its further development in India and the subcontinent. This training programme would focus on the correlation of Ancient Indian Texts to design philosophy of space, planning and ecology within the socio-cultural context.
